Heavier items in easy places																		
Remove unnecessary "things"																		
Automated Reminders																		
Timers installed																		
Alarms																		
Programmed smart phones																		
Check Expiration Dates																		
Food "best before" dates																		
Medicines issued, not used																		

This simple checklist will highlight your personal review of how an older adult's reduced reach, strength, balance, vision and obstacles may get in the way of safe living at home. A professional home assessment can provide a detailed report on home safety as well as identify areas of improvement based on real physical conditions and standardized criteria developed by Occupational Therapists. Email info@splusgroup.net for more information.
